Company introduction

RelyOn Nutec Multi-service safety and competence house

Sustainability statement

We are a global business delivering safety and competence services across the world, helping our customers protect their people, assets and the environment. Our training solutions are designed with the principle of providing realistic and fully immersive training experiences. Globally, our capability has developed beyond safety and survival training to include more advanced and technical training and corporate services to help companies better manage their overall training and competence needs. Knowledge and experience are transferable, and we play an increasingly significant role in developing a safe workplace helping customers in safety critical industries improve safety. Customers across the world choose and trust us year after year because reliability, competence and sustainability are our main priority.

Our responsibility and commitment to ensuring the safety of our employees and those affected by our business, remain core to our strategic commitment "safety is in our DNA". Understanding and managing our risks to avoid harm to people, related to all our activities, stand firm and are consistent with the United Nations Guiding Principles (UNGPs) on Business and Human Rights and the outlined ten principles. In 2021, we worked to further integrate the ten principles into our management system, built capacity to address and manage risks, and continued to embed environmental, economic and human rights due diligence into our processes. The Covid-19 pandemic introduced a need for new ways of engaging with potentially affected stakeholders in a time where risks of human rights impact were exacerbated.

RelyOn Nutec works consciously in line with the UN framework and management system for responsible corporate behaviour because we believe that globally agreed rules are necessary to solve global challenges and find sustainable solutions for the whole world. The framework also ensures that the initiatives we take actually contribute to sustainable development, and are not dependent on random trends or agendas. This report is our second Communication on Progress and it is still my pleasure to inform you that RelyOn Nutec reaffirms our support to the United Nations Global Compact, its 10 principles as well as the sustainable development goals.

Management summary

"Our employees' and delegates' safety and health are our highest priority. Health and safety are embedded in our culture."

RelyOn Nutec continued the dedicated work initiated in 2020. Environmental Social Governance (ESG) has been – and will continue to be one of the key areas of focus. The backbone of our CSR strategy – now also called Sustainability or ESG (Environmental, Social and Governance) - is shaped by the ten principles of the UN Global Compact. Our mission is to provide high-quality services, while also influencing and strengthening the compliance with internationally proclaimed principles for Human Rights and Labour Standards, Environment and Anticorruption.

- We strive to monitor and manage the sustainability risks associated with our business, as well as communicate our performance to our customers, so that we can support the success of their own businesses.
- We know that responsible business conduct provides sustainable, long-term business results, and that responsibility is a prerequisite for retaining our customers' trust and confidence.
- Addressing and working with the Sustainable Development Goals (SDGs) give our company an important voice.

Improving our gender composition

In 2022, our commitment to promote gender balance did not yield the desired outcome, resulting in a slight decrease in the representation of females within the organization. According to our baseline analysis – measured through the use of the Women's Empowerment Principles (WEP) Gender Gap Analysis Tool - from 2021, where the gender equality performance positioned us at "beginner level", in 2022 we had a significant increase, positioning us at the "improver level".

Our efforts to foster anti-harassment and satisfactory workplace culture, led to the implementation of e-learning courses, wording of policies, and several internal sessions to enhance anti-discrimination and equal opportunities across the organization.

In addition to that, we have performed an equal pay screening as part of our impact assessment, we have performed a gender pay gap screening and the result was 12%. We strive to lower the the gender pay gap even more. For reference the Danish gender pay gap is 18%.

Ensuring a healthy and safe work environment

Employees' and delegates' health safety and are our highest priority, and we pro-actively focus on mitigating and preventing incidents by raising awareness and thoroughly analyzing near-misses and unsafe acts / conditions. In 2022, our organization had a significant increase in LTIs and RWCs which leads to further enhancement and promotion of safety behavior and culture to reduce the number of cases in 2023. We constantly develop and implement strategic actions, such as global safety meetings and sourcing, to further address incidents, learning and improvement opportunities across all our facilities.

Our commitment to reduce our environmental footprint

As part of RelyOn Nutec's efforts to reduce CO2e emissions and work to improve climate resilience of operations, we are developing digital training solutions to support the energy transition. In 2022, our digitalisation has been accelerated and improved with an adaptive learning software. This year we have improved our CO2e emission calculation processes by refining our data, the data collection and included data from all sites. Additionally, we have included measurement of Scopes 3.3 and 3.6 in all countries.

Ensuring regulatory compliance

With a large geographical spread, we are committed to substantially reduce corruption and bribery, and to comply with the UN trade sanctions. As a company, we have decided to underline our zero-tolerance attitude to unethical behaviors, and to pro-actively improve anti-corruption policies and procedures and follow-up on trade sanctions.

As part of our commitment, we are actively engaging on trade restrictions to ensure regulatory compliance with the increased and fast-changing restrictions, including revision of the trade sanctions policy and procedure, improved process, and new sanctions screening tool.

With kind regards,

Torben Harring

Polaris cross-portfolio KPIs

Climate action

CO2e intensity gram/DKK revenue

Due to the complexity of our setup, our first few reporting years are solely focused on Scope 1 and 2. Our data has improved related to Scope 1 and 2, by including all sites in the reporting. Inclusion of Scope 3.3. and 3.6 (for some countries) in 2022 baseline. Our emissions are primarily in Scope 1 and 2. As category 3.3. and 3.6 are only minor categories the emissions is low. Further Scope 3.7 emissions will be included in 2023.

GRI: 305-1a, 305-2a, 305-3a, 305-4a

Climate Action Management

Scope 1 & 2

. Activity-based calculations.

Inclusion of Scope 3.3. and 3.6 (for all countries) in 2022.

Strategy & targets

Initial reduction strategy defined. Target for Scope 1 & 2 has been set and approved by the BoD.

Initiatives

Initiatives defined and approved by BoD. Implementation initiated for most locations

TCFD aligned analysis has been conducted and initiatives related to risks and opportunities launched.

Gender equality

Employee turnover

Employee-initiated turnover (total attrition)

% of women in the company

We participated in a "Target Gender

Equality" accelerator program to raise

gender equality performance and to

the share of women in the company. The

program helped us understand our current

identify our challenges and opportunities.

showed we were at "beginner level". We

have raised our score quite substantially.

The gender equality performance in 2022 is;

"improver level". Our baseline analysis (2021)

2022

The employee-initiated turnover has increased and most likely due to post COVID-19. The turnover, however, is 5%, which we consider an acceptable level balancing new talent and maintaining knowledge in the organization.

Portfolio company-specific KPIs and initiatives

Lost time injuries for employees

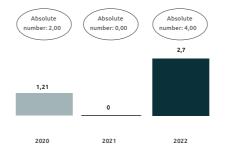

Lost time injuries for delegates

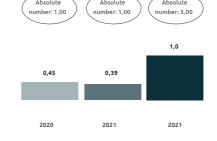

Regulatory compliance

Number of employee lost time injury events

Number of trainee lost time injury events

Trade restrictions screening

Target of 1.00 LTI frequency.

While LTIs in general are difficult to eliminate completely. RelyOn Nutec target O fatalities and O major incidents. Incidents have decreased, due to a continous global focus on safety. Incidents, learnings and sharing of best practices are systematized and discussed every month in global HSEQ groups.

Target of 0.50 LTI frequency.

While LTIs in general cannot be avoided completely, RelyOn Nutec targets 0 fatalities and 0 major incidents. We need to be pro-active and focus on preventing incidents by further analysing the near misses and unsafe acts/conditions. Safety culture training implemented.

Significant focus on trade restrictions to ensure compliance with the increased restrictions and fast-changing restrictions, e.g. related to the Ukrainian conflict, including revision of the trade sanctions policy and procedure, improved process and new sanctions screening tool.

Other environmental friendly initiatives

As part of Relyon Nutec's effort to reduce CO2e emissions and work to improve climate resilience of operations, we are developing digital training solutions.

In 2022, our digitalisation has been accelerated and is supporting the energy transition. Furthermore, we are continuously improving resource efficiency in our current training services.

Safety initiatives

We are hosting several safety initiatives to the community eg.; online workshop offered for free in Fire Risks and Safety at home, free first aid courses for mothers and children from 8 years old and free training for chaplaincy in order to comply with off-shore safety requirements when traveling out to mentally/morally support staff working off-shore.

Community contributions

In RelyOn Nutec, we believe it is important to give back to our communities. We do so through several initiatives across the organization. For example, in our sites in Asia; all staff have an annual "Sustainability day" to perform voluntary work on ESG projects, eg; beach clean-ups, teach first aid to local community, handymen at staff working off-shore.

Page 8 Sustainability Report 2022

The Sustainable Development Goals

RelyOn Nutec's contribution to the SDGs

.8

Protecting labour rights and promoting safe and secure working environments are the highest priorities for RelyOn Nutec. We continuously work to minimise risks and raise awareness about health and safety for our employees, both physically and mentally. We continuously train our employees on health and safety practices and ensure access to the right equipment, to execute their work in a safe manner.

5 5

At RelyOn Nutec, we proactively work to ensure gender diversity across the organisation with equal opportunities and terms. We ensure all employees have an equal voice in the workplace, including through adequate grievance mechanisms and employee satisfaction feedback systems and processes.

Increasing Positive Impacts

Suppliers

Minimising Negative Impacts

2 2

RelyOn Nutec operates business with respect for human and labour rights everywhere and expects the same from our business partners. As such, we developed a code of conduct for business partners which our suppliers must adhere to.

16.5

With a large geographical spread where business practices and customers vary significantly, it is very important for RelyOn Nutec to substantially reduce corruption and bribery in all their forms and to comply with UN trade sanctions.

13.1

RelyOn Nutec seeks to reduce our GHG emissions continuously and we will disclose our GHG emission data annually and strengthen the transparency of emissions. We focus on reducing emissions in operations and report on the progress of reduction initiatives.

RelyOn Nutec Sustainability Report 2022 Page 9

2 2

Health and safety are at the core of RelyOn Nutec's DNA. We are thus committed to ensuring the highest level of health and safety for our customers during trainings. We train customers to have the skill set to adequately manage safety in their operations. Our employees are properly trained to always create a safe environment for our customers.

Customers

13.1

As part of RelyOn Nutec's efforts to reduce CO2e emissions and work to improve climate resilience of operations, we are developing digital training solutions. Furthermore, we are continuously improving resource efficiency in our current training services.

Page 10 Sustainability Report 2022

The Sustainable Development Goals

RelyOn Nutec's contribution to the SDGs

INCREASING POSITIVE IMPACTS

Concrete initiatives in progress

- Measure the gender equality performance baseline through the use of the Women's Empowerment Principles (WEPs) Gender Gap Analysis Tool
- To understand our current gender equality performance through the facilitated use of the (WEP) Gender Gap Analysis Tool to identify our challenges and opportunities
- Redefine and track KPIs to ensure increased gender equality across management and board. Ensure minorities are represented in web, communication, and training material
- Ensure our picture library is updated with pictures that also represent minorities

Status on initiatives

- In 2022, our focus on gender balance in the hiring process has not had the desired effect, and we have regrettably seen a small decrease in our share of females in the organisation
- The gender equality performance in 2022 is; "improver level". Our baseline analysis (2021) showed we were at "beginner level". We have raised our score quite substantially
- We implemented e-learning and had several sessions on workplace culture and antiharassment and at the same time we launched an anti-harassment campaign incl. a new reporting tool
- Wording of policies updated to emphasise non-discrimination and equal opportunities across the Group, e.g. revision of procedures for the hiring process to encourage and facilitate more female candidate

- Conduct risk assessments and workplace assessments to ensure a healthy and safe working environment
- Train employees with the necessary tools to create and work in a safe environment for themselves and customers
- Make all relevant equipment needed to ensure a safe working environment available to all employees
- Report on near misses, incidents, unsafe acts and conditions in a global reporting system, in order to ensure consistency and continuous monitoring, assessment and improvement globally
- We have had a significant raise in LTIs and RWC in 2022. We are continuously focusing on safety behaviour and culture and expect that the continuous focus will reduce the number of cases in 2023
- We have implemented additional global safety meetings to further address incidents and learning opportunities. We are implementing the learnings across all our facilities
- We need to be pro-active and focus on preventing incidents by further analysing the near misses and unsafe acts/ conditions.
 Safety culture training implemented.

RelyOn Nutec Sustainability Report 2022 Page 11

MINIMIZING NEGATIVE IMPACTS

Concrete initiatives in progress

 Continuously ensuring our suppliers live up to our expectations on human and labour rights, the environment and anti-bribery, our Code of Conduct for Business Partners ensures that suppliers and their employees are not exploited and have proper working conditions

Status on initiatives

 The Code of Conduct for Business Partners has been updated. It is included in the global terms of conditions for customers, and it is a requirement that the Code of Conduct for Business Partners is part of all new agreements with our tier 1 suppliers

- Expand upon current CO2e baseline coverage to include more categories and continue to improve the depth of data collection to support decision-making on carbon reduction initiatives (both with respect to quality and granularity)
- Use the CO2e footprint to prioristise our efforts to reduce our emissions to the extent possible, both in our general operations and in our training. This includes using best practice efforts from various locations
- Assess climate risks and opportunities according to TCFD, among others, acute and chronic physical risks, impact of CO2e tax and impact of shifting energy markets
- Investigate measures to optimise our handling of waste, including identification of measures to reduce waste produced in our operations

- Inclusion of Scope 3.3. and 3.6 (for all countries) in baseline and further data improvement related to Scope 1 and 2.
 Further, Scope 3.7 emissions will be included
- Initiatives to improve resource efficiency and decrease use of energy and resources have been implemented, e.g. LED bulbs, -, motion light sensors, increasing digital training solutions, among others
- Climate risks and opportunities have been assessed according to TCFD. TCDF assessment reviews are performed on an annual basis.
- Several initiatives on handling and reduction of waste have been identified e.g. plastic cups and cutlery are replaced with glasses, mugs and wooden cutlery, reducing food waste, waste recycling, etc.

- Anti-Bribery and Corruption (ABC) e-learning to all employees once a year
- Update ABC procedures
- Continuous screening and follow-up on trade sanctions
- Significant focus on trade restrictions to ensure compliance with the increased restrictions and fast-changing restrictions, e.g. related to the Ukrainian conflict, including revision of the trade sanctions policy and procedure, improved process and new sanctions screening tool
- Trade restriction screening of 100% of all corporate customers
- Gifts and hospitality policy and reporting tool assessed and reviewed

Sustainability Initiatives in Different Countries

AMERICAS

Free training for chaplaincy in order to comply with off-shore safety requirements when traveling out to mentally/morally support staff.

Online workshop offered to the community about Fire Risks and Safety at home.

Free first aid courses for mothers and children from 8 years old.

EUROPE

Replace all lamps to LED.

Waste sorting and recycling.

Replacement of plastic cutlery with wooden cutlery.

MIDDLE EAST

Replacement of plastic items with wooden cutlery.

Plastic cups replaced with mugs and glasses.

Motion light sensors.

ASIA

All staff have an annual "Sustainability day" to perform voluntary work on ESG projects, eg; beach clean-ups, teach first aid to local community, handymen at orphanages etc.
